

AUTOMATIC CONCRETE FEEDING MIXER FT1.2

Hunan Kamuja Machinery & Equipment Co.,Ltd

INTRODUCTION

This product can replace generator sets, loaders, mixers and tankers. As well as more than six staff, is a new generation of building industry leading products. The tank can be rotated at 270 degrees with no dead ends on three sides.

FEATURES

① Man-sized radiator

Radiator adopts international advanced panel independent cooling system to ensure this the oil lifter quality and temperature control.

② Duplex gear pump

Duplex gear pump easy maintenance high pressure not easy to wear. It increases the oil inlet and outlet and ensures the required flow rate of the whole machine.

③ Oil-less bushing

The machine uses oil-less bearing wear resistance is 100 times that of a common case because of butter only once a year.

④ Reduction gears of tanker

It uses the BMS large torque motor which is from domestic famous manufacture a reasonable ratio maximizes efficiency.

⑤ Filter(Cleaner)

It adopts self-sealing oil filter with high accuracy and convenient maintenance. Double pump lifter the oil in and out to effectively protect the life of hydraulic parts.

⑥ Tubing

All tubing used international standard joint to make sure there is no oil leak large flow easy to maintenance and universal.

HUNAN KAMUJA MACHINERY & EQUIPMENT CO.,LTD.

Room 818, 4th Floor, Chang Tong Logistic Center, No.18 Qingzhuhu Road, Changsha, Hunan, China

Tel: +86 0731 88677248 alvaro.jin@kamuja.cn www.kamuja.cn

Certificated Company of GB/T 19001-2016/ISO 9001:2015

SPECIFICATIONS

Item	Specification	Unit	FT1.2
Diesel Engine	Type		YN27GBZ
	Total displacement cylinders		2670cc,4-in-line
	Injection		Direct injection and mechanical control
	Cooling system		Water-cooling,dry air filter
	Maximum power	Kw	55
	Maximum torque	N-m/r/min	230/1600-1800
Electric System	Generator		28v-500W
	Battery		2*12V-60AH(272A)
Speed	The first high speed/second high speed	Km/h	0-16.5/0-32.5
	The first low speed/second low speed	Km/h	0-6/0-12
Axle and Tyre	Rear axle oscillating	±	10°
	Tyre		25.5-16
Mixing and Unloading	The geometrical volume of drum	L	2200
	The rotation speed of drum	r/min	18
Equipment Hydraulic System	Maximum flow rate	ml/r	32/40
	Maximum pressure	Map	16
Loading	Capacity	m ³	0.43
	Times		3
Maintenance and Oil filling	Fuel tank	L	110
	Total hydraulic system capacity	L	110
	Engine	L	10
Weight	Operating weight	kg	4500
	Max Weight	kg	7500
	Load-carrying capacity	kg	3000
Steering	Assisted by double displacement loading sensor power on steering wheel to turn, articulated steering.		
4*4 Four-Wheel Drive	Hydraulic torque converter gearbox, open hydraulic gear oil pump, and reverse gear control to control working speed and travelling speed.		
Brakes	External disc brake and emergency brake acting on four wheels, independent dual circuit brake and hand-control to braking.		
Water system	24V Self-priming volumetric water pump with quick-suction Max flow:90L/min, one water tank, Total capacity:175L Visual flow meter, the water intake by manual control		
Cab	Closed cab with heating system,tilting front window, humanized seat flexible suspension and height adjustment are provided.		

※ The technical information may vary by the update policy, the changes will be without prior notice.
